1 WEBSITE IDEA

The idea is that there'd be a local art gallery and creative space that showcases artists around the area, showing off their work, while also being a place that teaches those who want to learn some lessons in visual arts, with a subscription to let people know when there are vacancies for new artworks to be displayed.

This would serve to help the local community as artists that once struggled to find a place to promote their work would finally be able to do so and would be a place that would help support the growth in people's creative hobbies, making it easier for people who are interested in learning about the practice.

The target audience would be the upcoming artists who aspire to become great, the local artists who wish for a space to market their work and people who want to want to buy prints.

A website would be needed to make the gallery/ workshop known. To make this happen the website will need five web pages, each detailing what the business is about. The following pages include:

- The home page
This page would show the viewer who's interested some information on what this organization is about. What we do for the community as well as what usually happens during exhibitions and workshops.
- The "About Us" page
This page would speak more on what the organization does in detail. Using pictures and videos as well to explain how we operate to the user, As well as mentioning the people involved in this organization, such as the owner, the lead artists, etc.
- The "Our Work" page
This page would highlight all the work done in the community, with reviews from people who've experienced what this organization has to offer. With a few pictures, and illustrations that display all that work
- The "Gallery" Page
This page will house images of the artworks that will be put on exhibitions, it will also have illustrations of other artworks that weren't

displayed in the gallery, so that art enthusiasts are able to find more pieces of art. And it will also display art currently for sale.

- The “Contact Us” Page

This page will have the organization’s contact details displayed to the view so they can contact the organization.

The page will also have a form for the user to fill out to subscribe to our newsletter so they can keep updated on all the events taking place at the art gallery.
